Re:	HW3

Part III)

Did you need to re-build the Lightbulb when you replaced the button?

No, since we are using an interface a rebuild wasn't necessary.

There was nothing difficult about this assignment except the submission protocol as we had to build multiple projects to show the progress of the assignment. I have completed the assignment so it is a full submission. There is a table below showing code coverage for all my classes and all Junit tests

Element	Class	Methods	lines
Button	100% (1/1)	71% (5/7)	77% (14/18)
LightBulb	100% (1/1)	80% (4/5)	83% (10/12)
tableLampMain	100% (1/1)	100% (1/1)	80% (4/5)
tableLampTest	100% (1/1)	100% (1/1)	100% (11/11)
PushdownButton	100% (1/1)	83% (5/6)	88% (16/18)
tableLampTest	100% (1/1)	100% (1/1)	100% (11/11)

The Cyclomatic complexity is 7
